

South Eastern & Chatham Railway Society

Register of 4mm scale kits, RTR items, and line-specific ancillary items

Introduction

The purpose of this register is to list kits and line-specific ancillary items available for modelling the SER, LCDR and SE&CR in 4mm scale. A brief description of the main materials of the kit or item is included but no assessment is given as to ease of construction or accuracy/fidelity.

There are sections at the end of the table which list RTR items available. While not strictly kits, it was thought that listing these items would help a potential modeller.

The register is sub-divided into six parts as follows:

- | | | |
|-------------------|-----------------------|------------------|
| 1) Locomotives | 2) Coaching stock | 3) Wagons |
| 4) Lineside items | 5) Paints & Transfers | 6) Manufacturers |

If a kit or item is not listed, this will generally mean it is not in production. This may be due to a change of ownership and the non-availability is temporary or the manufacturer has ceased trading. Such items may still be available second hand from other sources(see Obsolete Items section)

If, on reviewing the list, you are aware of items suitable for inclusion, or where production/sale has ceased or when a manufacturer has changed name or address details, please advise the Chairman of the SE&CR Society via the website email address.

Inclusion in this list does not imply approval or, by their absence, disapproval by the SE&CR Society.

The supply of kits and ancillary items to railway modellers is often in the cottage industry sector. Consequently, supply can be variable, proprietors retire, businesses are taken over, addresses change and some items cease to be available. This list can, therefore, only be taken as a starting point for your own enquiries. Most manufacturers have a website.

Manufacturer Abbreviations:

CC	Cooper Craft	PD	Parkside Dundas
MM	Mousa Models	DJH	DJH
RM	Roxey Mouldings	LRM	London Road Models
FBR	Falcon Brassworks (ex Jidenco)	CAM	Cambrian Models
P&W	Perseverance & Westward Kits	SEF	South Eastern Finecast
AG	Alan Gibson	GAP	Golden Arrow Productions
WW	Worsley Works	F79	Five 79 Model Railway Kits
FT	Fox Transfers	MSE	Model Signal Engineering
MK	Mike King	WB	William Barter
BRL	Branchlines	DS	Dean Sidings
SBM	Southwark Bridge Models	SERK	SERKits
MARC	MARC Models	SAT	Steam and Things
PPP	Phoenix Precision Paints		

Manufacturers' contact details are shown at the end of the list.

For all kits – check for items NOT supplied with the kit, eg., motor, gears, wheels. In the case of some coach kits, detailing kits may be available as a separately supplied item.

Material abbreviations:

EB	Etched brass	ENS	Etched nickel silver	EZA	Etched zinc alloy
PLS	Plastic	RES	Resin	WM	White metal
STL	Steel	BR	Brass	CB	Cast brass

The above were produced for my own modelling to give maximum validity and detail within the minimum construction time, but can be supplied to others to order. There will be a lead time as the etcher has a minimum order quantity so I need enough orders to meet that before ordering. I like to supply construction notes before asking for commitment so you can see exactly what you are getting. Castings, wheels, bogies etc not included, but any other part that can reasonably be represented by etching is. (William Barter)
